

**TECHNICAL DATA SHEET**

Name:	Utwardzacz U-2 / Rigidizer U-2
Opis:	Product based on colloidal silica. Recommended as fiber surface impregnation (mats, modules, fittings) to increase hardness and erosion resistance. Used in the manufacture of ceramic refractory materials.
Color:	Clear, slightly opalescent
Nominal density:	1,1-1,2 g/cm ³
Efficiency:	Depending on the application manner
Application:	brushing, dipping, rolling, spraying
Drying:	Temperatura pokojowa lub wyższa
Types of packaging:	Buckets 1, 5, 10, 15 kg
Storage:	Without air access, at temperatures above 5°C
Notes:	The above data are for informational purposes only and are based on laboratory tests and practical experience
